INTRODUCTION

- HELLP syndrome is a progressive and severe variant of pre eclampsia, eclampsia (10-20%)
- Incidence 0.5-0.9% of all pregnancies .
- Maternofetal complications
 - 6.7-70% perinatal mortality and 1-24% maternal mortality .

CONCLUSION

- The outcome of HELLP syndrome depends on early diagnosis , timely interventions like prompt delivery ,transfusion of blood and blood products and a multidisciplinary approach
